

From Skies to Space, EANAN Reveals Game-Changing Aerospace Tech

We were honored to be featured live on **Sama Dubai TV** on **June 17 at 6:00 PM**, spotlighting the future of aviation and EANAN's pioneering role in advancing the UAE's aerospace sector.

Our **Director, International Business Development, Eng. Mashaal Al Marzooqi** joined the interview to share expert insights on the next chapter of air mobility. The discussion explored transformative technologies, including EANAN's groundbreaking work on **detonation engine systems**, an innovation poised to revolutionize how we launch satellites into space using UAV platforms.

In the studio, we proudly showcased the **J500 drone**, one of our flagship platforms, offering the audience a close-up look at the engineering behind our high-performance UAVs. From design to deployment, the J500 represents our commitment to safety, precision, and future-forward thinking.

This appearance reflects EANAN's mission to build the future of flight while engaging with the wider community and sharing our vision for smarter, more sustainable skies.
