

# Eanan Achieves Three Global Certifications in Aerospace Excellence

Eanan, a UAE-based manufacturer of advanced unmanned aerial vehicles (UAVs), has reached a major milestone with the achievement of **three internationally recognized certifications**. This accomplishment reaffirms our dedication to world-class standards in **quality, sustainability, and workplace safety**, cementing our reputation as a trusted leader in the commercial aerospace sector.

The **EN 9100:2018 certification** sets the **global benchmark** for aerospace quality, ensuring our UAVs meet the highest standards of **safety, reliability, and performance**. It also secures Eanan's place on the **IAQG OASIS platform** (Online Aerospace Supplier Information System), the official international database for certified aerospace suppliers a mark of trust and credibility worldwide.

With **ISO 14001:2015**, we demonstrate our commitment to **minimizing environmental impact**, complying with international regulations, and driving sustainable growth.

Meanwhile, **ISO 45001:2018** reinforces our health and safety standards, reflecting our commitment to protecting our people, building organizational resilience, and fostering a culture of workplace safety and performance.

For our clients and partners, these certifications represent **trust, reliability, and competitive advantage**. They position Eanan as the **partner of choice in advanced air mobility and aerospace manufacturing**, where innovation is always delivered with integrity.

As a UAE-born pioneer, we continue to shape the future of commercial aerospace while contributing to the nation's vision of **sustainable industrial leadership** on the **global stage**.
